

LISK CMS v.4.4

## **TUTORIAL**

### **Backing Up and Restoring Your Site**

## Introduction

In this tutorial we will learn how to back up your web site's Database. We will then download the back up file to your computer. After that we will show you how to upload the file back to the server and restore the Database.

If at any step something is not clear we recommend you to check [Backup & Restore](#) help area in the General Help section of the Help Center.

## Backing up database

To start the backup:

1. Click [Backup](#) link in the left menu of your control panel, you will see a page similar to the one on the picture.
2. In the "Backup options", on the top, check "Database" checkbox.
3. Click "Backup" and wait until a new row appears in the top of the list, below the backup options.
4. Click [Download](#) link on the right of the backup file.
5. Download the Database file to your computer.

Later you don't have to download the backup file to your computer. You can also delete the backup file by clicking the corresponding [Delete](#) link.

Upload backup file to the server :

| Date                      | Options                                 | Size     |  |
|---------------------------|---|----------|--|
| April 28 2006 17:19:51    | Files & Images / Database / Source Code | 20.83 Mb |  <a href="#">Install</a>  <a href="#">Delete</a> |
| March 17 2006 16:32:12    | Database                                | 79.9 Kb  |  <a href="#">Install</a>  <a href="#">Delete</a> |
| March 3 2006 10:15:12     | Database                                | 79.9 Kb  |  <a href="#">Install</a>  <a href="#">Delete</a> |
| February 23 2006 14:15:13 | Source Code                             | 2.06 Mb  |  <a href="#">Install</a>  <a href="#">Delete</a> |
| January 4 2006 11:00:00   | Files & Images / Database               | 17.84 Mb |  <a href="#">Install</a>  <a href="#">Delete</a> |

## Restoring the database

In the  Restore section list find your backup file and click  Install link next to it. The database will be restored using the information from the file.
